## Introduction

People who work in caring roles, such as veterinarians, nurses and doctors, are often so focused on helping others that their own needs can be neglected. One of the most common needs to be neglected is taking care of one's personal finances. It's understandable too... people in caring roles have other very pressing priorities and taking care of your own finances can easily be put aside as a task for another day. However, in order to care for others, people employed in caring roles must first care for themselves and this includes all aspects of personal care: emotional, physical and financial. The benefits of personal budgeting are clear. Creating and using a personal budget allows you to achieve much more than simply living from one pay packet to the next. A personal cash flow budget will enable you to establish your financial priorities and ensure you have the capacity to cover essential expenses and the flexibility to decide how you would like to spend or save your money. Additionally, a budget will enable you to plan to have a little extra for contingency. This Learning Guide outlines the basic steps to create a personal cash flow budget.

## Five steps to create a personal budget

A personal cash flow budget can be created by following the steps below:

## Step 1. Determine your current financial position - bank account \& loans

Check how much money you have in your bank accounts and other investments and then determine how much money you owe (e.g. on credit cards or loans). What is your current financial position? For an example please see Table 1 below:

Table 1: Example balances for Jane Student's cash on hand and owings

|  | Balance at $30^{\text {th }}$ June 2014 |
| :--- | :--- |
| iSaver account | $\$ 2,740$ |
| My savings account (with debit card) | $\$ 404$ |
| Total bank account | $\$ 3,144$ |
| Car loan - principal left to repay | $\$ 3,000$ |
| Student loan (low interest) | $\$ 2,000$ |
| Total owings (liabilities) | $\$ 5,000$ |

## Step 2. Determine your anticipated income over the next twelve months

For people working for wages or on a salary, it is as easy as checking pay slips to determine net income (after tax and super). However, it's a little more complicated for contractors and people who are self-employed,. In such cases, you can calculate how much overall tax you will need to pay via tax calculators available on the Australian Taxation Office (ATO) website, and/or use your most recent tax return, quarterly Business Activity Statements (BAS) and advice from your accountant to calculate your outgoings for tax payments and also determine when payments to the ATO are required.

When determining your current income remember to include other sources of income such as interest on savings or government payments. When you know how much you make per annum, and when you make it, allocate it to your budget in the months that it will actually come into your bank account.

See Table 2 below for an example of an income pattern for a student:

Table 2: Jane Student's budgeted income pattern for 2014 - 2015

| Item | Jul- <br> 14 | Aug- <br> 14 | Sep- <br> 14 | Oct- <br> 14 | Nov- <br> 14 | Dec- <br> 14 | Jan- <br> 15 | Feb- <br> 15 | Mar- <br> 15 | Apr- <br> 15 | May- <br> 15 | Jun- <br> 15 | Total <br> year. | Notes |

| Income |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Wages | 1600 | 500 | 500 | 500 | 1600 | 2000 | 1000 | 1600 | 500 | 500 | 500 | 500 | 11300 | 1,2 |
| Other <br> income |  | 100 | 100 | 100 | 100 |  |  |  | 100 | 100 | 100 | 100 | 800 | 3 |
| Total <br> income <br> p.a. | $\mathbf{1 6 0 0}$ | $\mathbf{6 0 0}$ | $\mathbf{6 0 0}$ | $\mathbf{6 0 0}$ | $\mathbf{1 7 0 0}$ | $\mathbf{2 0 0 0}$ | $\mathbf{2 0 0 0}$ | $\mathbf{1 6 0 0}$ | $\mathbf{6 0 0}$ | $\mathbf{6 0 0}$ | $\mathbf{6 0 0}$ | $\mathbf{6 0 0}$ | $\mathbf{1 2 1 0 0}$ |  |

1 Wages variable due to more work over Semester break
2 Two weeks Phase 1 clinical EMS at Bug A Lugs Vet Services
3 Allowance from parents

## Step 3. Determine your anticipated expenditure over the next twelve months

Write down all of your current expenses and be sure to make an honest and realistic appraisal of your spending. You can track your expenditure for a month or more for an accurate assessment of how much you spend. It is useful to categorise your spending, such as fixed expenses, variable expenses and discretionary expenses, as listed below.

Fixed expenses include:

- Mortgage payment/rent
- Vehicle loan or lease
- Other loans
- Insurance
- Education
- Savings plan
- Any other expenses with fixed monthly/weekly payments

Variable expenses include:

- Groceries
- Utilities
- Phone
- Maintenance
- Clothing
- Transport
- Medical

Discretionary expenses include any expense not directly essential to day to day living, such as:

- Entertainment
- Clothing
- Furniture
- Holidays
- Sport
- 'Pocket money'

For an example of a university student's expenditures see Table 3:

Table 3: Jane Student's budgeted outgoings for the next year

| Expenses | $\begin{aligned} & \text { Jul- } \\ & 14 \end{aligned}$ | $\begin{aligned} & \hline \text { Aug- } \\ & 14 \end{aligned}$ | $\begin{aligned} & \text { Sep- } \\ & 14 \end{aligned}$ | $\begin{aligned} & \text { Oct- } \\ & 14 \\ & \hline \end{aligned}$ | $\begin{aligned} & \text { Nov- } \\ & 14 \end{aligned}$ | $\begin{aligned} & \text { Dec- } \\ & 14 \\ & \hline \end{aligned}$ | $\begin{aligned} & \text { Jan- } \\ & 15 \end{aligned}$ | $\begin{aligned} & \text { Feb- } \\ & 15 \end{aligned}$ | $\begin{aligned} & \text { Mar- } \\ & 15 \end{aligned}$ | $\begin{aligned} & \text { Apr- } \\ & 15 \end{aligned}$ | $\begin{aligned} & \text { May- } \\ & 15 \\ & \hline \end{aligned}$ | $\begin{aligned} & \text { Jun- } \\ & 15 \end{aligned}$ | Total year. | Notes |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Dining out and takeway food | 100 | 100 | 100 | 20 | 100 | 150 | 150 | 100 | 100 | 100 | 20 | 20 | 1060 |  |
| Entertainment | 50 |  |  |  |  | 50 | 50 | 50 |  |  |  |  | 200 |  |
| Car maintenance |  |  |  |  |  |  | 500 |  |  |  |  |  | 500 |  |

| Spending money | 150 | 100 | 100 | 200 | 50 | 400 | 200 | 200 | 100 | 100 | 100 | 100 | 1800 | 6 |
| Total expenses p.a. | 696 | 423 | 423 | 681 | 373 | 1038 | 4296 | 588 | 423 | 661 | 343 | 843 | 10788 |  |

4. Annual health check and vaccination in December
5. Regular donation to Animal Welfare League
6. Vet students ball

## Step 4. Do calculations to determine if you will have enough to cover expenditure in each month

This step involves subtracting your expenses from your income. It is your choice whether you work this out based on weekly, fortnightly or monthly income/expenses. Monthly is the common choice. See Table 4 for an example of the combination of incomings and outgoings, and the effect on the overall bank balance.

Table 4: Example of a summarised personal cash flow budget with times of negative cash flow but overall positive bank balance

| Item | Jul-14 | Aug- <br> 14 | Sep- <br> 14 | Oct-14 | Nov- <br> 14 | Dec- <br> 14 | Jan- <br> 15 | Feb- <br> 15 | Mar- <br> 15 | Apr-15 | May- <br> 15 | Jun- <br> 15 | Total <br> year. |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :--- | :--- |
| Total <br> income p.a. | 1600 | 600 | 600 | 600 | 1700 | 2000 | 2000 | 1600 | 600 | 600 | 600 | 600 | 12100 |
| Total <br> expenses <br> p.a. | 696 | 423 | 423 | 681 | 373 | 1038 | 4296 | 588 | 423 | 661 | 343 | 843 | 10788 |
| Net <br> Cashflow | 904 | 177 | 177 | 19 | 1127 | 1062 | -3296 | 1012 | 177 | -61 | 257 | -243 | 1312 |
| Opening <br> Bank <br> Balance | 3144 | 4048 | 4225 | 4402 | 4421 | 5548 | 6610 | 3314 | 4326 | 4503 | 4442 | 4699 |  |
| Closing <br> Bank <br> Balance | 4048 | 4225 | 4402 | 4421 | 5548 | 6610 | 3314 | 4326 | 4503 | 4442 | 4699 | 4456 |  |

So, what is the outcome? Do you spend more than you earn? Will you have times of financial stress you can anticipate in the coming year? See Table 5 for an example of a cash flow budget for a student under financial stress. Or do you manage to cover all of your expenses and save some money too? If you are spending a lot more than you earn then you need to drastically rethink how you manage your expenses, and if your income and expenses are more closely aligned you may decide to make changes in your spending patterns in order to ensure you accumulate savings.

To restructure your expenses set an amount of money that is reasonable for you to spend each week after all your fixed and variable expenses have all been accounted for. This requires that you realistically examine the expenses that you can and cannot alter. For example, your mortgage or rent is a fixed expense, so in order to reduce expenses you will need to examine discretionary expenses i.e. those expenses you have control over. Be realistic about what you are prepared to change. Do not simply decide to reduce your food bill by $\$ 30$ a week without having a plan regarding what you are prepared to change. For example, you might decide to purchase cheaper brands at the grocery store, or you may decide to take your lunch to work instead of buying it. Regardless, your expense targets should be analysed using the SMART strategy:

- Specific - how much are you spending on a particular expense?
- Measurable - how much do you realistically need to spend?
- Attainable - is the expense affordable for you?
- Realistic - can you afford this expense without forgoing essential items?
- Timely - is it the right time to spend this money? Should other expenses be paid first?

See Table 6 for an example of an adjusted personal cash flow budget.

Table 5: John Student's situation of financial stress exposed by his cash flow budget

| Opening Bank Balance $=562$ |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Closing Bank Balance | 694 | 766 | 828 | 590 | 712 | 794 | 456 | 448 | 540 | 642 | 744 | 636 |  |  |

Notes 1 My share of house rent and bills
2 Purchase of second hand books for Uni
3 Change to cheaper mobile phone plan when contract due for renewal
4 Reduce annual holidays to one short hoilday
5 Reduce day to day spending by buying a travel mug and taking my own coffee in the morning instead of buying it
6 There are still months where outgoings are greater than income, but by sticking to the budget the bank balance remains in the black

## Step 5. Monitor your progress

Review your personal cash flow budget once a month to ensure that you are on track with your income and expenses. Determine if you are over or under budget. Do you need to alter your budget to be more realistic? Can you put more money into savings than you originally planned? Revisit the SMART list to check that your budget is working for you. Regular review of your budget will ensure that the personal budget you have prepared remains realistic and relevant for your needs.

## Additional personal budget considerations

The numbers you plug into your personal cash flow budget calculations are flexible. You can change how much you decide to spend on entertainment, clothing, even rent, but some expenses are easier to change than others. Some people apply the principle of don't spend it unless you have it. This is a very useful strategy to avoid high interest payments and to ensure you remain within your budget.

Here are some tips for ensuring you meet your budget goals:

- Factor in emergency expenses
- Remember to make seasonal adjustments (e.g. for heating in winter)
- Remember to make adjustments for when you are to go on extra mural studies for your university course or other activity or holiday
- Revise your budget when your financial circumstances change
- Be aware of hidden expenses (such as bank charges or loan fees)
- Keep your personal budget goal in mind to keep you motivated to achieve your goal
