

Doctor of Science (DSc)

Cumulative Listing of Student Theses

Earth Sciences

School of Physics, Chemistry & Earth Sciences

*Please Note: *denotes where there is a rock collection with the thesis.*

MAWSON, D. 1909 - 1. Geological Investigations in the Broken Hill area. 2. Chialtolites from Bimbowrie, South Australia.

WARD, M.A. 1926 - Notes on the geological structure of Central Australia.

JACK, R.L. 1929 - 1. Papers on the mineral deposits of South Australia. 2.

Papers on underground water in South Australia.

ALDERMAN, A.R. 1942 - Petrological studies.

WILSON, A.F. 1954 - Studies on Australian charnockitic rocks and related problems.*

RADOSLOVICH, E.W. 1968 - The crystal structure of layer silicate minerals.

RIEDEL, W.R. 1974 - Increased understanding of the stratigraphy of Cenozoic Radiolarians and contributions to the formative phases of micropalaeontology of other groups.

SEGNIT, E.R. 1987 - Contributions to pure and applied mineralogy.

HILL, R.J. 1990 - Contributions to crystal chemistry.

EGGELTON, R.A. 1999 - Structure and determinative mineralogy with emphasis on layer silicates.

McCLAY, K.R. 2000 - Structural geology and tectonics.

de DECKER, P. 2002 - Australian Quaternary studies: a compilation of papers and documents submitted for the degree of Doctor of Science in the Faculty of Science, University of Adelaide.

McGOWRAN, B 2007 - Cenozoic foraminifera in the Indo-Pacific region: stratigraphy, oceanic and environmental change, and faunal impact.

MURRAY-WALLACE, C.V. 2009 - Amino acid racemisation geochronology: contributions to the understanding of Quaternary sea- level changes, neotectonics and coastal evolution.
